Programing Languages: HTML, SCSS, Bootstrap 5, Angular 15, Angular Materials

Tools: JIRA, Gerrit, Visual Studio

IrvineTek Projects

Camden Health System. (HMIS)

Camden health system consisting of several advanced clinical and non-clinical modules. We offer healthcare solutions to public and private sectors that are affordable, scalable and easy to use.

My Contribution:

- Developed important non-clinical modules like Employee Profile, Leave Management, Loan Management, Roster, Inventory, and Job Application.
- Took charge of testing and fixing to ensure our modules worked reliably.
- Successfully linked the user interface with the server using RESTful APIs.
- Worked closely with different teams – developers, designers, and product managers.
- Optimization and Performance Enhancement:
